

## The Revolutionary Cold Chain Management Solution

- CHAIN OF CUSTODY ASSURANCE
- SELF-POWERED
- NO DRY ICE!
- NO NEED FOR REFRIGERATED/REEFER TRUCKS
- NO NEED FOR WALK-IN OR DRIVE-IN COOLERS
- SHIP AND/OR STORE MULTIPLE CONTAINERS AT DIFFERENT TEMPERATURES
- STATE OF THE ART TECHNOLOGY

## Climate Controlled Containers CCCM-Series Refrigerated Shipping Container

**This Container** employs a high-efficiency, CFC-free refrigeration system for cooling when the outside is warmer than the payload, and electrical heating elements to prevent payload freezing when the outside is colder. High performance allows thin sidewall and door construction for maximum cargo area. It will accept either our custom reusable aluminum pallets or standard 48" x 40" GMA pallets.

**The Container** may be run or recharged from any 115/230 VAC, 10A/5A power outlet, and will run on it's internal batteries. It may optionally be equipped with temperature recording or communication and tracking capability to verify your shipment has been at the required temperature while in transit.

**The Climate Controlled Containers** refrigerated pallet-sized shipping unit allows you to pay only for the refrigerated space you need. It may be consolidated with non-refrigerated cargo to eliminate expensive refrigerated LTL shipment costs. It may be used as stationary battery backed-up cold storage for critical materials.

## Features:

- Precise temperature control.
- Multiple units allow multiple payload temperatures on one truck.
- Units are stackable three high and lockable with truck door style 2-point cam latch.
- Accepts durable aluminum or standard 48" x 40" GMA pallets.
- Can run on AC line power or internal batteries.
- Easily handled with forklift – 3-way access from door end and both sides.
- Environmentally friendly! No dry ice contamination. No hazmat CO2 or exhaust emissions. No truck engine idle required.
- Optional Position Tracking & Temperature Logging and Reporting via Internet subscription.
- Ship and drop loads during off hours with fewer traffic issues.

## Specific Applications

- |                           |                         |                                |
|---------------------------|-------------------------|--------------------------------|
| • Art                     | • Grocery Supply        | • Pharmaceutical / Bio-medical |
| • Confections - Candy     | • Hot Shot transport    | • Produce                      |
| • Chemicals               | • Liquids               | • Rail Transportation          |
| • Disaster Relief         | • Logistics / Trucking) | • Restaurants                  |
| • Flowers                 | • LTL Carriers          | • Seafood                      |
| • Food Distribution       | • Marine                | • Fishing - Hunting            |
| • Food Services- Catering | • Military              | • Warehouse storage            |
| • Government              | • Offshore              | • Wine                         |
